The box should be able to store everything necessary to play Kill Team (for both players) plus space for additional equipment. This includes:

- Barricades
- Markers that are included in the starter set
- The TacOps cards (also if used with thick sleeves)
- Measurement rulers
- Up to 20 dice D6 with 16mm
- More space for additional dice, laser pointers, ...

There are holes in the box and lid for 5 mm magnets (height 1 mm).

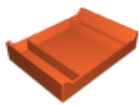

I added two more lids which can be used as a tracker for current turn, command points and victory points. Choose one of the three lids. The lid having the tracker on the bottom must have supports for printing.

Note: The print files for the lid does have a color change pause for the logo!

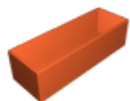

### **My print settings**

- Brand: Original Prusa i3 MK3S+
- Material: PLA
- Resolution: 0.25 mm
- Infill: 10%
- Support: No support necessary except for the lid having the trackers on the bottom
- No rafts
