updated 24. 2. 2024 | published 24. 2. 2024

Summary

Remixed the 120x120x25 to 130x130x25 and added an insert that can hold 100 - 10mm ammo.

[Household](#) > [Other House Equipment](#)

Tags: [10mm](#) [ammobox](#)

I used PLA+ and printed the insert with 2 walls and 10% infill to speed the process up, should be around 4 hours. Insert should be printed face down to prevent need for supports.

For the box and clip I used PETG and increased the infill to 25% and 3 walls. Should take about 4 hours to print both top and bottom together.

Use 2 of the same clip from original post.
