Summary

Holds my spoon for coffee grounds from the lid of the container. I printed in ABS but should be ok with other materials.

[Household](#) > [Kitchen](#)

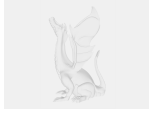

This was printed in FDM/FFF process. You should assume the usual food safety concerns still apply.

I printed with 0.20mm layers. Low % or no infill should be fine. No Supports It may be nice to insert a magnet after printing if your spoon is metal. The hole in the bottom is sized for 3x6mm magnet. You can add a modifier to close this if it's not needed.
