Summary

For instant cameras. Create a magnetic photo stand or display the photos on the fridge.

[Household](#) > [Home Decor](#)

Tags: [mini](#) [fujifilm](#) [instax](#) [polaroid](#) [square](#)

This design uses **5mm neodym sphere magnets** in all four corners. Create a photo stand or display the photos on the fridge.

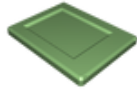

Print the upper and lower frame separately, put the magnets in and just slide the pieces into each other when finished.

I have uploaded versions for Polaroid and Fujifilm. It is very easy to change the format so just **send me a message** or write in the comments **if you need a different size for a different brand**.
