Summary

A USB holder that can hold multiple. IMPORTANT print standing up so there are NO supports on the inside. look in summary

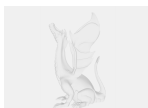

[3D Printers](#) > [Creality Parts & Upgrades](#)

Any layer height works just unscrew 2 screws on the left hand side of the printer and keep the washers on and then rescrew. If it is still loose (it shouldn't) but if it is print around 97 - 99 percent of the original model. I also included files for easy editing to suit your needs. If you want to upload your edited files make sure to give me credit as it will make everybody's lives easier
