Summary

it's a spinner

[Toys & Games](#) > [Other Toys & Games](#)

It's a spinner that's been inspired from a kunai made by "Zetko" I used Zetko work (information only) for the bearing. The rest is as easy as it look. It's not comfortable for the hand like it is but, i will work on it to make it more ergonomic. It's a good spinner for now but it will be better in a near futur. It can be print in PLA 1,2mm buttom and 1,4 on top. No support, juste brim. Use airsoft projectil for the ball inside the bearing.

Attention: need to be print (100.4%) bigger to let the airsoft ball to roll a easy as possible.
