2. This model is of a loth cat and has 3 poses; sitting, standing and laying down. In getting ready to print I suggest scaling the model so that the models are at least 1.5 inches (sitting, standing) and 0.85 inches (laying) height due to fragile feet. Even at this minimum size I had to glue the feet back on after support removal so keep that in mind. I would also suggest more shells or increased infill as there can be cracks printing as is on some default settings. Other than that, enjoy. Why be a crazy cat lady when you can be a crazy Loth cat lady instead.

If it gets 10 likes I will add more poses and a potential model that can sit on shoulders of action figures as a new model
