Tags: [kitchen](#) [organizer](#) [knives](#)

The solution I came up with at home to organize knives in the drawer, safely and making it easy to find the knife you want to use.

It comes in two sizes, one for large-handled knives and another for "normal" handles.

The structure is modular, print the number you need based on the knives you want to organize. To connect the modules, just print the connectors and firmly insert them into the slots provided.
