### Summary

For use with generic height adjustable standing desks with parallel metal support bars.

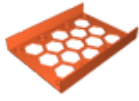

[Household](#) > [Office](#)

Tags: [cable](#) [desk](#) [cover](#) [adjustable](#) [magnetic](#) [height](#)

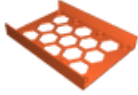

This cover is designed to go between the support bars of several height adjustable standing desks to provide a cable cover that secures cables under the desk but also makes them easily accessible. The design uses 12x3mm round magnets easily purchased from Amazon or other retailers. Simply glue the magnets to the underside of the covers and attach to the underside of the desk.

I have the "AITERMINAL Electric Standing Desk" from Amazon in the US but I understand the frames to be somewhat generic. the inside dimensions of the covers are including in the STL name.
