DM Screen Dice Tower

Small and easy to print. Great to print multiples of and share with your players or just print one and use it yourself.

Can be used on a flat surface or clipped onto your DM Screen (3mm thick) to save space.

Quick and easy print in place files available or available in parts.

- The main file prints in place both the tower and the fold out tray. Maybe harder to print if your printer/filament has issues with bridging
- An alternative print in place file is also available that prints the dice tower and tray open but uses more space on the build plate
- Alternatively can print parts separately by splitting it on your slicer or using the provided parts here with preconfigured orientations.

NOTE: The alternative print in place dice tower configuration has slightly different parts then the main one to help with print orientation, particularly the hinges.
