A little clean storage solution for your Tamper or Distributor.

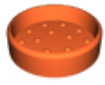

You can easily fit any size up to 58.5 mm in the mat. Forced Tamper like the nomcore tamper fit right on the rounded edge from the mat so the coffee particles can fall off the ground.

If you have smaller Tampers or Distributors, i added little points on the ground so they dont sit even on the ground in the old coffee particles.

I printed it in TPU so its easily washable but it will work with PLA, PETG too.

Happy printing!
