I designed this model to help me with scooping packaging peanuts and so far it has worked out well.

I printed mine in Blue PLA on my Bambu Labs X1C and took 5hr 2min to print. The scoop needs the following hardware to mount the handle to the scoop body;

- 4 - M3 Nuts
- 4 - M3 Washers
- 4 - M3 x 12 Hex Socket head cap screws

Included files are the STL and 3MF files for PrusaSlicer and Bambu Studio.
