Summary

you know the kind...

[Hobby & Makers](#) > [Organizers](#)

Holds 4 of those cheap AF hex drivers all over ebay/Amazon. The case has a lip around the edge of the top, but if that's not enough, it also has pockets for 5x1mm round neo magnets. You could go bigger, but not by much.

Use the giant flat top of the case to add text in PrusaSlicer like, "Chea AF Hex Driver Set" LOL.

I've included both STEP and F3D files for easy editing if yours are different in size.
