Summary

This is a light weight and cheap exhaust (and dust) cover for the prusa XL. There are more add ons to this

Tags: [cover](#) [exhaust](#) [prusaxl](#)

This model is the cover for the Prusa XL which can be easily created and extended for little money. The printer is of course fully operational with the cover and the cover allows to collect all fumes from printing as well as protecting the printer from dust.

The cover is mostly made from cardboard with a few printed parts. Cardboard cutting instructions are in the attached PDF.

The PDF also explains in detail why the cover is useful&healthy.

Oh and - sorry, but there are only very few printable parts for this, but it can be easily extended with printable parts!
