Make sure to customize the yellow_pikachu-back so it has whatever information you want to convey! You can do that in PrusaSlicer by following this article: https://help.prusa3d.com/article/text-tool_399460 yellow_pikachu-back.3mf is already configured with text and a filament color swap.

The .3mf files are already configured for color swaps on the appropriate layers. I suggest using a 0.25mm nozzle for yellow_pikachu-back so your text is legible.

The eyes and ears are keyed to different parts of pikachu's face. Test-fit your parts to make sure they are in the correct location before gluing.
