### Summary

Replacing the smaller 3" vent line with a 4" and using a powered exhaust fan to vent the machine.

Tags: [adapter](#) [ventilation](#) [vent](#) [wecreat](#)

I was tired of the smaller 3" vent the WeCreat system ships with. Purchased a 4" powered inline fan to help vent outside. This adapter will allow me to run from the machine to the outside in 4" flex tube.
