Meet your kids's next favorite bath toy!

For stability underwater, insert a penny (or a 0.2 cent euro coin) and an **8x3 magnet** into each fish (details in images). The rescue hook uses a similar magnet. Both magnets and coins are securely press-fitted, requiring some effort to insert, particularly for the coin. Use actual fishing line or another robust cord for the line.

*This toy is designed with a low choking hazard for infants. Please assess its safety for your children.

Printing is straightforward:

- **Fish and Hook:** 0.2mm layer height, 2 walls, **10 bottom layers**, 40% grid infill for necessary weight. Brim advised for fish. No supports needed.
- **Trap, Ends, Fishing Pole:** 0.2mm layer height, 2 walls, 3 bottom layers, 15% grid infill. No brim or supports Needed.
- **(See listing photos for Slicer Pics)**
