Update:

Here you can find [the Grogu coaster model I designed](#) to go with the Coaster Base model and all the other models designed by [Nerdyviews](#).

After printing [Nerdyviews](#) epic **Mandalorian-themed** coaster, I saw that we were missing 2 main parts.

First, A Grogu/Baby Yoda version for the coasters, and also a holder that you can store all of them together. So I designed them myself!

This is the Mandalorian Coaster Holder to go with [Nerdyviews](#) series of coasters.

This model is a multicolor model that can be printed with one tool head and without an MMU (manual changes).

This model has 3 color changes. I added a picture to show the color changes, also I added a 3mf that is ready to print with all the color changes at the right spot!

Colors:

1. Gray
2. Silver
3. Gray

Hope you like it! and make sure to post a make so I can see it :)
