A robot that used to serve people, but now serves to smash people!

I built this guy to be more optimal for FDM printing, but I'm sure it'll look fantastic in SLA as well. The whole model is included, mostly for example, but it is printable if you want. I recommend printing in pieces (especially if printing in FDM) with supports and raft on for best results.

If you like my work and want to see (and print) more of it, please consider stopping over at my online miniatures store at [Punkin' Figs](#). All of my 3D printable releases are printed before release to insure that they print well even on a simple, starter FDM printer.
