Just a fan work and a realization of an old dream I had when I was a kid to build a big 'ol army of spacefaring space nuns from 40kya in the future. These sisters love battle, that's for sure!

I made these ladies a while ago, but never got around to painting them, so here they are! This is all of my barbecue team space Catholics, all in one place.

Seemed like most of the Adepta ladies you can print are resin only, and that just won't do for us old farts tinkering on FDM printers still. This one was printed on an Ender 3!
