I made a P38 so my dad could use it to play Wings of Glory, as it's his favorite warbird. Base, props and the plane are included, but you'll need altitude pegs and something to attach it to them with. I just used a piece of toothpick, myself. You'll also need all the usual stuff, game rules, maneuver deck, damage deck, etc.

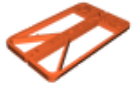

If you like my work and want to see (and print) more of it, please consider stopping over at my online miniatures store at [Punkin' Figs](#). All of my 3D printable releases are printed before release to insure that they print well even on a simple, starter FDM printer.
