Just a fan work and a realization of an old dream I had when I was a kid to build a big 'ol army of spacefaring space nuns from 40k in the future. These sisters love battle, that's for sure!

So although Plasma guns aren't typically associated with these ladies, the inquisition gets anything it wants, so I think there's some wiggle room in the lore here.

Seemed like most of the Adepta ladies you can print are resin only, and that just won't do for us old farts tinkering on FDM printers still. This one was printed on an Ender 3!
