Summary

A kit card Airliner that fits back into the card

[Toys & Games](#) > [Other Toys & Games](#)

Tags: keychain

This is a kit card I designed for fun. The airliner also goes back into its frame to be able to be put on a key chain.

The build process is pretty intuitive, but make sure to put the wings and elevator on before putting the two fuselage halves together.

Note: The model is small so put the printer on .15 mm layer height or less to get a quality print. Also you can scale up the model for a better print. No supports needed.
