Needed some legendary cavalry for my amazons, so I mocked up these ladies and stuck them together. I made the riders the right size to be compatible with the horses (and other animal mounts) that [Brite Minis](#) makes for his Patreon, so you can mount your amazons on other types of rides as well.

Definitely requires supports, ideally tree supports.

As a side note, I had a partial nozzle clog on the sword of the rider of the darker Pegasus, which made it look all gross and bubbly. Instead of throwing it away, I built it out with a little glue and turned it into a FIRE SWORD lol!

The other amazons pictured are mostly from Punkin' Figs, but I also have amazon warriors on my Thingiverse here too.

If you like my work and want to see (and print) more of it, please consider stopping over at my online miniatures store at [Punkin' Figs](#), All of my 3D printable releases are printed before release to insure that they print well even on a simple, starter FDM printer.
