There is a certain satisfaction that comes with creating powerful, empowering sculpts of bad ass women which you can print without the need for supports or rafts on a stock Ender 3 with stock "superfine" settings on Cura on the same day you set up your printer. I admire people who tweak their printers to do amazing things, but my favorite sculpts and sculptors are those that require no specialized knowledge or modifications to print.

This one of literally hundreds of such easy-print miniatures I've made and uploaded onto Thingiverse and/or Punkin' Figs. Enjoy, and happy May!

Prints without the need for supports!

If you like my work and want to see (and print) more of it, please consider stopping over at my online miniatures store at [Punkin' Figs](#), All of my 3D printable releases are printed before release to insure that they print well even on a simple, starter FDM printer.
