A boat with a trireme style ram for an unofficial water-war conversion of Gaslands that I'm unironically referring to as BOATLANDS. I have other boats in my Gaslands Collection here on Thingiverse, but these are the stock boats I've used.

Print them, stick Gaslands guns and stuff to them and paint them, then use them according to the standard rules of Gaslands with all the same templates and everything. The only difference is that the vehicle types have new and different names:

Bikes = Jet-skis

Buggys = Rowboats and Dinghys

Cars = Boats

Performance Cars = Performance Boats

Trucks = Fishing Boats

Tanks = Hovortanks

Bus = Yacht

If you like my work and want to see (and print) more of it, please consider stopping over at my online miniatures store at [Punkin' Figs](#), All of my 3D printable releases are printed before release to insure that they print well even on a simple, starter FDM printer.
