The latest mods from Ellie Valkyrie's garage! I kept seeing people post about how they wanted to run Gaslands in a nuclear winter environment, so I figured why not kick off the first salvo by making 3D printable mods for it and a couple of cars to show the bits off?

Herein, you'll find everything you need to get your insulated death machines sliding around the subzero track. Insulated guns, heated blowers, snowplow rams-- we've got it.

The two cars are "Let's Go, Lascaux" and "Knott Yeti" Kudos if you can get the reference on the second one!

Credit also goes to the Smithsonian Museum for the mammoth tusks and the triceratops skull!

Let's make GLACIERLANDS a thing!

Requires supports.

If you like my work and want to see (and print) more of it, please consider stopping over at my online miniatures store at [Punkin' Figs](#), All of my 3D printable releases are printed before release to insure that they print well even on a simple, starter FDM printer.
