A simple retro-style atomic symbol which clips into a base. Can be printed in any color you choose for board games, gifts to friends and even for RPG use.

No supports or glue required! (Glue helps!) Prints in about 45 minutes on an Ender 3 with all standard settings in Cura.

If you like my work and want to see (and print) more of it, please consider stopping over at my online miniatures store at [Punkin' Figs](#), All of my 3D printable releases are printed before release to insure that they print well even on a simple, starter FDM printer.
