I felt like there was an extreme lack of miniatures specifically for Eclipse Phase, so I've been making some remixes for morphs I'd love to see in a game. This one is a favorite of mine-- an uplifted cyborg sperm whale body you can upload your consciousness to and swim around in zero gravity with.

That's what the fans are for-- navigating in zero gravity.

If you like the basic whale design, please consider supporting the original creator by visiting the link that shows what I remixed this guy from.

Definitely needs supports.

The robot is one of my modular robots. You can find it here: <https://www.thingiverse.com/thing:4595113>

If you like my work and want to see (and print) more of it, please consider stopping over at my online miniatures store at [Punkin' Figs](#), All of my 3D printable releases are printed before release to insure that they print well even on a simple, starter FDM printer.
