Long ago, a wizard animated an army of slaves from the boulders and stones in the depths of a magic mine. Centuries later, long after the disappearance of the wizard, these stony thralls have banded into tribes that prey on anyone unlucky enough to stumble into their lands.

Included is the leader of one such tribe. You can get the whole pack of stone bandits over at [Punkin' Figs!](#)

All of my stone bandits (both this one guy and the pack over at Punkin' Figs) print without the need for supports. Raft recommended.
