commercial licenses will be accessible through my Patreon page, 'Vixvvo3D', at the affordable rate of \$6 per month. I aim to consistently post and model new content on a weekly basis. Your support on <https://patreon.com/Vixvvo3D> is greatly appreciated! (edited)

If you want a particular size, use the provided print profiles. If you like to experiment, get the Fusion 360 file and adjust various settings. The design ensures that all punch holes are automatically calculated and evenly placed. You don't need to mess with manual settings, just set the basics and let the math do its work. The rows of punch holes are automatically calculated and will be centered on the outer wall.

### Customizable Parameters:

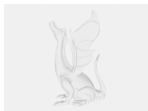

- Height
- Width
- Length
- Wall thickness

- Corner Radius
- Save space on the top and bottom
