Contained herein, you will find the file needed to print your own plasma-pistol wielding Electro-Lich Duelist.

No one likes to talk about what happens to spacers unlucky enough to die on Nastrond, the seventh planet in the Niflhel System. No one likes to talk about the necro-ships that tear themselves from the icy seas of that world to haunt and hunt the spacelanes of that sector, but fly a cargo route through their space and you're sure to see enough sensor ghosts to put your hairs on end. "Electro-Liches," they're called, the dead spacers, corrupted by some kind of mechanical virus that turns them into mind-linked horror soldiers bent on achieving some unknowable, alien goal. In my years, I've seen men cut down by these wire-ridden skeletons, and I've seen others dragged into the shadows by them, dragged away to be cut apart and made into more horrors for the undead swarm.

This is the first Electro-Lich I am releasing, but I have dozens more I have designed and printed that I'm going to be releasing in waves soon. These releases will primarily be on my Patreon at: (<http://www.patreon.com/eswynn/>) and on my store at: (<http://www.punkinfigs.com/>).

If you like my work and want to see (and print) more of it, please consider supporting me on Patreon through the link above. All of my 3D printable releases are printed before release to insure that they print well even on a low-end printer like my Ender 3.
