A while ago, I found these awesome buildings for Battletech, but I can't seem to find them anymore. Anyway, these ruined structures are a remix of two of those buildings, so if you find them, I'd be grateful if you'd link them in the comments. I've searched high and low, no joy.

I remixed these ruins for tabletop tests of my 6mm game Ortus Novae. You can use them for your RPG or wargame of choice, as they work great at any scale and print well without supports!

Ortus Novae is a simple, free, easy-to-learn, ever-evolving, 6mm scale tabletop war game in a post-apocalyptic setting. The system is designed for flexibility, allowing you to field any models you wish in large-scale wargaming with a minimum of crunch. Simply assign a die scale to your model and get out there!
