Are you a brave enough dude to explore the depths of the Temple of Thagmanaz?

The module included as part of this set is built to be compatible with the Highest Skies RPG rule set. A free version of the rules set (entitled Fantastic Quest) is included with this module. To purchase the full version of the Highest Skies RPG system, [click here](#).

To run The Temple of Thagmanaz, you'll need the Volcanic Basalt Cavern set [here](#) and elements from DutchMogul's Meepleverse. [Get it on Patreon](#). You can, of course, use any terrain (or none) with this module. You'll also need some pieces from DutchMogul's [Fimbulpeaks](#) set as well. The printable elements included herein were made specifically for this module, but can be used elsewhere as well.
