I needed some sandy, desert temple terrain for upcoming dungeon crawls and so I made these dual-sided terrain pieces which can be printed with matte gold for a neat sandy-looking effect. This terrain set is made to be compatible with DutchMogul's Meepleverse. If you aren't familiar with it, you can find it on Ill Gotten Games' Patreon page: <https://www.patreon.com/illgottengames/posts> . It's amazing stuff, and it's the only terrain set I use (it and compatible bits) as I really dig minimalism in tabletop dungeons and board games.

I made these in preparation for the release of some future adventure modules for my RPG system entitled "Highest Skies." You can find out more about Highest Skies on my Patreon: <https://www.patreon.com/eswynn/posts>
