After playing Bit Dungeon (one of my old favorite video games) I decided to make some little terrain bits that are inspired by the art in the game. This terrain set is made to be compatible with DutchMogul's Meepleverse. If you aren't familiar with it, you can find it on Ill Gotten Games' Patreon page: <https://www.patreon.com/illgottengames/posts> . It's amazing stuff, and it's the only terrain set I use (it and compatible bits) as I really dig minimalism in tabletop dungeons and board games.

I made these in preparation for the release of my first adventure module for my RPG system entitled "Highest Skies." You can find out more about Highest Skies on my Patreon: <https://www.patreon.com/eswynn/posts>
