In putting together a couple of adventures using the Meepleverse assets, I realized that adding in actual weapons, objects, etc. could really add a level of immersion to the game, so I created this simple rack design complete with tiny meeples weapons that fit on it. Just having racks isn't enough. :)

If this is your first exposure to the Meepleverse, check out the original Kickstarter for the full core set: <https://www.kickstarter.com/projects/292543184/meepleverse>

I also have a lot of meeples heroes and other neat things in my collection entitled "Meeples." https://www.thingiverse.com/Ellie_Valkyrie/collections/meeples

These pieces all print without supports, and presumably without a raft as well, though I always print everything on a raft myself.
