Twelve Robot Soldier meeples sized to be compatible with Meepleverse and the latest edition of Pocket Tactics.

I print all my meeples at 150%, but at 100%, they're the same size as Meepleverse and Pocket Tactics default meeples. The antennas are only .5mm wide, so you'll need to use super fine settings on your printer to get them to come out perfect if your running something janky like my poorly-leveled, stock Ender 3.

I've recently started making special hero meeples available for sale. Need a hero, a villain or just an NPC that you can mass-print in any color you choose? Looking for something simple and minimalistic to give your Roleplaying Game (or board game) some sleek and streamlined style? Meeples on my site "Punkin' Figs" are a simple, inexpensive alternative to high detail miniatures, and need no paint in order to look great! Find more over at www.punkinfigs.com.
