This is a remix of the Bultaco 3D Logo by Supergus 1968. I didn't do much, just removed the stand and increased the size of the base to make it into a flat paperweight. Printed on fastest on an Ender 3, it took 8 hours.

Takeaways: I should have used a higher infill. Also the peg for the thumb logo had to be glued, as did the letter U. I attempted to fix this with some creative shape-shifting in TinkerCAD, but your mileage may vary.

Printed this as a gift for my father-in-law, who used to race Bultaco bikes.
