The latest mods from Ellie Valkyrie's garage! A whole pile of pipes, blowers and burners to give your Gaslands cars the extra oomph they need to burn rubber around the table (or at least to look like they can.)

I printed these without supports on an Ender 3 with medium quality detail on a raft with no supports and all the holes printed as they should. My Ender 3 is kind of sloppy on the settings and I always do quick-print options, so you should be able to get these quality of results or better with your unit of choice.
