[meeples](#)

After being inspired by DutchMogul's Meepleverse Kickstarter and the idea of using meeples as pieces in an RPG, I taught myself TinkerCAD and started making meeples of my own. This is my first design-- a spear-throwing soldier.

This meeple is sized for Meepleverse, Tiny Epic, etc. I prefer mine a little bigger, so I print at 150%.

I print everything with rafts and supports on, but no supports are needed with this guy and you can probably print him directly on glass with no issues.
