There are a lot of cable clips and organizers but most of them are bulky, and not easy to use. To solve this i designed the cable clip which helps you easily store your cables. just roll the cable and slide it into the clip through the slot present. And when needed just remove it.

An easy to print clip takes just "10min" and "1g filament". so print just a few with your spare filament or a bunch for all your cables.

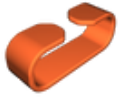

### Print settings:

layer height- 0.2mm

walls- 3
