## Summary

They magically stay upright on the bottom! You make the rules, the coins just say the points! Oh, they can float too.

---

\*Low choking hazard design for infants. Please use your judgment regarding safety for your kids.

Perfect for pool and bath play, each coin uses a penny (or 0.2 cent euro coin) for stability underwater (details in images). Coins are securely press-fitted, no glue should be needed.

-----Print Settings:-----

**To make them sink:** 0.2mm layer height, 2 walls, **10 bottom layers**, 3 top layers, 40% grid infill. Yes, 10 bottom layers!

**To make them float:** 0.2mm layer height, 2 walls, 3 bottom layers, 3 top layers, 15% grid infill.

Color Swap: If you want two colors that's easy with these! Pause/Change filament for the last 4 layers and you'll get colored numbers :)

**Coin Holder-** Print as imported! no supports.
