Summary

A printed cover for the HTU21 temperature sensor

Tags: [temperaturesensor](#) [htu21d](#)

This is a design I created to mount a HTU21 sensor to the outside of an enclosure.

The project is a dew controller, and as the sensor needed to measure the dew point, it needed to be mounted on the outside of the enclosure.

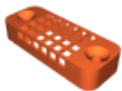

Designed with OnShape

Sliced with PrusaSlicer

Printed in PLA with standard profile
