Summary

This is a very simple filament guide for the Creality Ender 3 V3 SE

[3D Printers](#) > [Creality Parts & Upgrades](#)

I made this filament guide so that I could mount the spool holder off the printer to make it more compact. The arm that supports the filament is at a 45 degree angle. It is attached using the screws from the original filament holder (with room for adjustment).

I printed it in PLA with 0.2mm layers, 15% infill and no supports.

It may work better with supports but I haven't tried.

Please feel free to remix and make suggestions!
