Great **additional Doublecurve** set compatible to Hubelino® a Marble run for Lego® Duplo®.

Its for marbles around Ø25mm.

You can choose 3x3 and 4x4, each left and right direction

Did some optimization for better printing, like connected stud holes, thicker walls and after much test-prints i managed to get the clearance perfect. The bricks should fit like the other ones.

I printed with X1C in PLA+, you can try ABS & PET as well! Share your knowledge.

While testing get some warping, because of that i added a little brim.

I create only parts which are missing in the base set! The base parts you could buy #support Hubelino®, here is a affiliate link <https://amzn.to/3Rn1mES>

Happy printing 😊
