### Summary

Tool Holder for a Shark Stick Vacuum Cleaner.

Tags: [vacuum](#) [toolholder](#) [caddy](#) [shark](#) [hoover](#)

Our new vacuum didn't come with a thing to hold the tools, so made this little thing to sort the issue. Bolts together using 2 x M5 nuts and 2 x M5 x 30 Socket bolts. Works perfectly and the tolerance allow for the tools to both snap fit and slide from the top into the holes.

It does not damage the vacuum in anyway and fits neatly within the original footprint of the device.

In theory this should work for all current shark tools and vacuums as long as the tools are around 38mm Dia and the shaft 40mm dia.

Print with anything, I used PETG as its the best :P.  
So good for functional prints.
