updated 10. 7. 2024 | published 10. 7. 2024

### Summary

I have strengthened the handle mounting point on the body part. It will fit the original handle. (TPU95 recommended !)

Tags: [flyswatter](#)

update : PETG only for a while till it broke in the webbing part, have just reprinted in TPU95 and is a lot stronger though it flops around a bit. I used painted on supports as shown in the attached pics. (Yes, it is a little more tricky in TPU to remove)

Update July 2024 : the TPU95 version is still working (5 mths on), really stuns the geckos so I can then pick them up and throw them in the yard, and aims well for the tennis shots at flies on the move. TPU grey version photo added.
