Summary

I'm doing my part! Helmet from Helldivers 2, current work in progress. Ver 7 should be good to go!

[Fashion](#) > [Men](#)

Tags: [cosplay](#) [helmet](#) [helldivers](#)

I pulled the 3d model from the game and started modeling it, because nobody should have to pay for 3d models here it is, in its unfished glory! A few more edits will be coming, however if someone can get this version to print (I'm getting a few of errors) id be curious to see what they did.

This is my first 3d model in 15 or so years so (thank you 3d printing for getting me reinterested in a old hobby), I'd appreciate feedback from other modelers.

V7 should be complete! I said before I wanted to put this out before too many people paid +\$30 for a model that they might not even be able to print!
