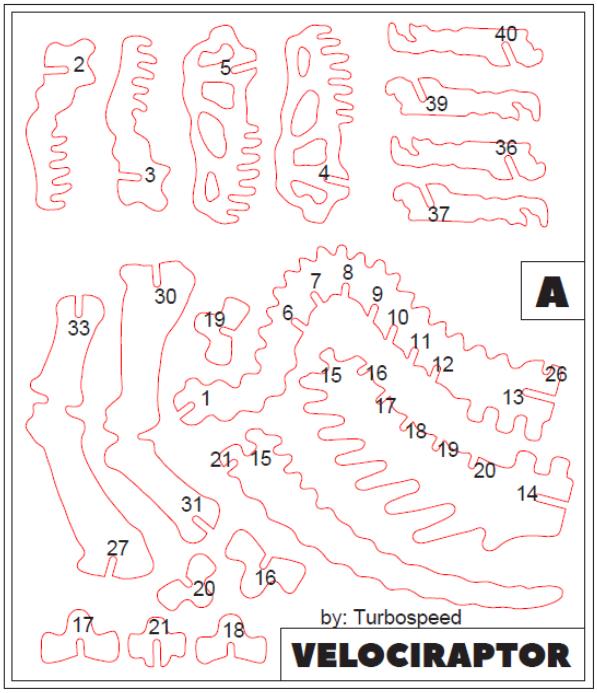
Summary

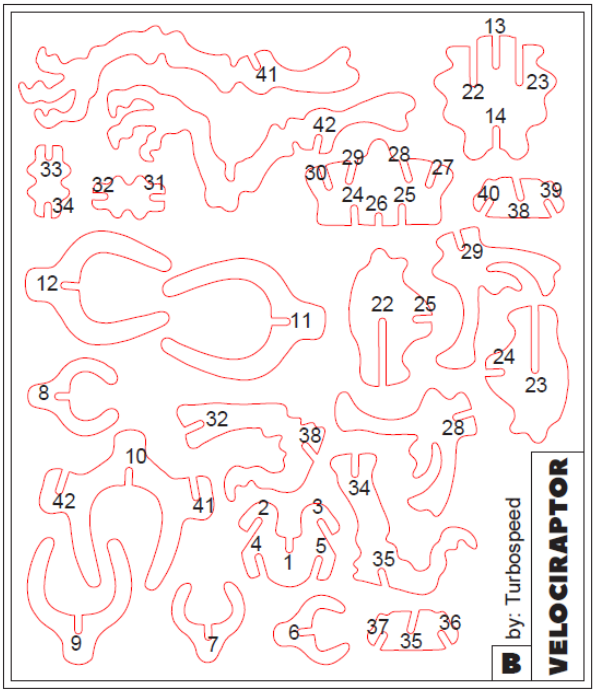
Velociraptor 3D Puzzle

Toys & Games > Other Toys & Games

Tags: puzzle toys dinosaur 3dpuzzle kitcard

I split this design into two cards, A & B, so it be printed with smaller build plates. No AMS/MMU is needed since it is a single-color print. The overall size of the velociraptor is about 145mm tall once assembled. Each piece is about 1.3mm thick to give it a snug fit. Please follow this cheat sheet below to assemble the puzzle.





Some tips:

- Print at .2mm layer height
- Print with Arachne walls or equivalent in Prusa slicer
- Make sure to check the feet, #35 & #38 slots should be pointing towards the inside or it won't be able to stand. Check the pictures for reference.
- If you get stuck, try to assemble it in parts; head, legs, and neck separately.
- Slow down your print to reduce string if your filament is not calibrated
